

Joysale – An advanced buy and sell script

Version – 2.3

# **Joysale Buynow Installation**

**Script: Joysale v2.3**

### Step 1: Unzip the package

- While unzip the package of the buynow, which you have received. You can find “Buynow\_Source” Folder
- In that folder you can find “buynow” folder and “main.php” file.

### Step 2: Configuring Buynow Plugin Files

- Once you have found the file and folder. Copy the “main.php” file to the following location(Replace the already existing file in that location).
  - ***/protected/config/***
- After that copy the “buynow” folder to the following location.
  - ***/protected/modules/***

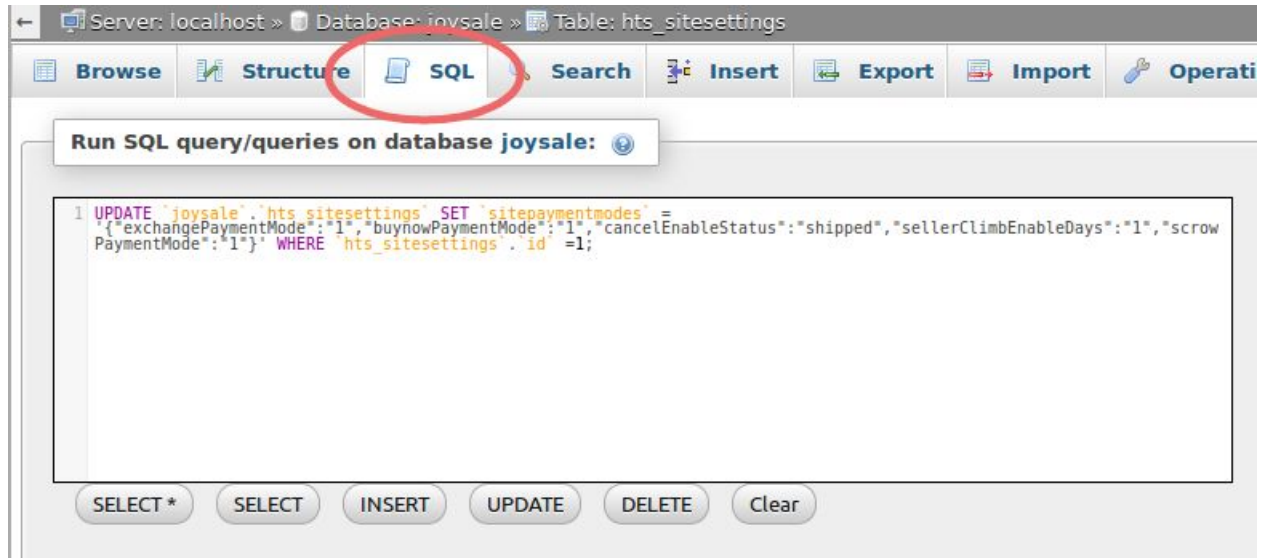

### Step 3: Configuring Buynow Database

- Run the following query from the “Phpmyadmin” panel under your database “sql” tab section as show below.

```
UPDATE `joysale_test`.`hts_sitesettings` SET `sitepaymentmodes` =  
'{"exchangePaymentMode":"1","buynowPaymentMode":"0","cancelEnableStatus":"processing",  
sellerClimbEnableDays":"0","scrowPaymentMode":"1","buynowPlugin":"1"}' WHERE
```

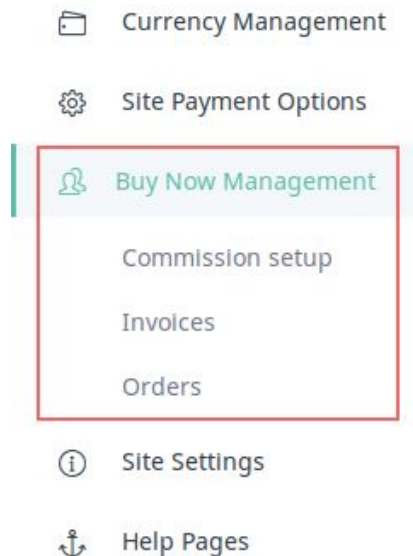

``hts_sitesettings`.`id` =1;`

#### Step 4: Check the Installation

- Please login to your admin panel and you can find new menu option in the left side bar as shown below

- Now you can proceed to configure the buy now module for your server.

- Also you can manage the buynow module anytime by Opening **Admin panel** and select **Site Payment Modes** from the **Site Payment Option** tab. You can manage the Buy now option by Enable/Disable from **Buynow Transaction Mode**.
