

Twilio -Mobile number verification

This document help to send sms to world wide mobile number using twilio account.

Step:1

1. First create a twilio account in www.twilio.com. Go to signup from create new account.
Signup url: <https://www.twilio.com/try-twilio>.
2. In signup form field answer 3 question choose below mentioned answer,
 - A) Which product do you plan to use first? -SMS
 - B) What are you building? - phone verification
 - C) Choose your language? PHP

Step 2:

After successfully completed signup process,page redirect to twilio dashboard.

- i) Goto “**Account Settings**”. There are two API Credentials display in this page.
- ii) First one is **Live credential**,second one is **test credential**.
- iii) In developing purpose use test credential api account id ,authenticate token use in your code.

Step 3:

Buy number is important one of sending sms to mobile number.if you want twilio number pay some amount to the site admin.In developing purpose twilio provide some magic number(+15005550006),this number only help to check the sms process is success or not.sms not sent test credential process.

Step 4:

Configure twilio in admin panel:

Admin dashboard => site setting => Mobile sms settings. Save your twilio API credential account sid, auth token, twilio mobile number (buy number in twilio).
